## LANGUAGES

Malayalam  
Native / Bilingual Proficiency

English  
Professional Working Proficiency

Thrives in stimulating environments, encourages effective teamwork, takes initiative, and motivates efficiency. Prefers to work at a multinational company with defined systems and processes as well as strong channels of networking.

## WORK EXPERIENCE

Vizuara (May 24, 2022 - July  
Frontend 24, 2022)  
developer

Upgraded existing static website to dynamic. Refactored old code into components and added functionality. Implemented website with CRED functionalities for managing data.

Ragam  
Technical Joint Cordinator

Coordinated meeting between Technical heads and juniors for pitching ideas and discuss about progress. Chosen tech stack for the projects. Made multiple websites for different events.

Industrial and Planning Forum  
Technical Head

Implemented multiple website for the events conducted by club and official club website. Divided and distributed work among juniors and ensured given task completed within time frame.

Tathva  
Senior Software Developer

Created website for smooth conduction of the fest. Modified existing website for events. Built script to send mass emails. Added features to existing scripts for efficient working.

## PROJECTS

Ragam Webiste  
Website for one of South India's biggest cultural festivals  
Users will be able to reserve accommodations and register for events, lectures, and workshops. They can view the registered events on the dashboard. The website also has an eye-catching landing page.  
ragam22.netlify.app

NITCMUN'21 Website  
Webiste of NITCMUN'21  
Users will be able to register for events and create accounts. Delegates will be able to access the specifics, directions, and rules via the dashboard. A certificate for those who successfully completed the event will be made available in the dashboard.  
nitcmun.ipfnitc.com

IPF website  
IPF website  
An interactive 3D model is on the landing page. Website displays events, Instagram series, and blogs by the club  
ipfnitc.com

Interface website  
Interface website  
interface-  
community.netlify.app

Tathva Website  
Website for one of South India's biggest techno-management festivals  
Users will be able to create accounts and register for events, lectures, and workshops. The dashboard allows them to view the registered events. The website also features a gorgeous landing page.  
t20-frontend.netlify.app

Email script  
A javasript code for mass mailing  
Data on a CSV file is used to send emails to recipients. The email's content will be made dynamic based on CSV variables. Along with this, simple HTML templates are also created.

NITCMUN'20 Website  
Webiste of NITCMUN'21  
The website contains details about the events and instructions for delegates.
